End Application:

4920-01-467-9113so, radar test station

Unit Type:

General purpose relay switching module

Criticality Code Justification:

Feat

Special Features:

Mfg name surepath relay switching module; this item is a single slot, c size, vxi module containing 64 spdt (form c) relays; maximum switching current 2 amps; maximum voltage 220 vdc / 250 vac; option 01 is vxi interface and slave control daughter board; electrostatic discharge sensitive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-b
