Special Features:

This is the (capre) system, common aircraft portable reprogramming equipment. This includes the laptop computer nsn 6625-01-472-7468, an gpib to aag cable, usb to gpib adapter, pcmia lan card, ccm software. All items are encased in a protective case. The capre system is used to download operational flight programs and mission data files from secure bulletins boards and secure websites over the siprnet. The capre will then process this information into a suitable format which is then uploaded to either another reprogramming device or the lru's needing reprogramming

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T263-c
