Overall Length:

10.100 inches

Special Features:

Compression fitting 0.750 in. Npt; 316 stainless steel; cell constant 10; integral 20.0 ft. Cable included; titanium electrodes; flow rate 0.0 to 10.0 ft. Per second fully immersed; insertion depth 7.0 inches

Functional Description:

Used to accurately measure conductivity/resistivity from ultrapure and pure water applications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
