Overall Length:

10.100 inches

Special Features:

Compression fitting 0.750 in. Npt, 316 stainless steel; titanium electrodes; cell constant 1.0; insertion depth 7.0 inches; flow rate 0.0 to 10.0 ft. Per second fully immersed; integral 20.0 ft. Cable included

Functional Description:

Used to accurately measure conductivity/resistivity from ultrapure and pure water applications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
