**Overall Length:**

10.100 inches

**Special Features:**

Compression fitting 0.750 in. Npt, 316 stainless steel; titanium electrodes; cell constant 1.0; insertion depth 7.0 inches; flow rate 0.0 to 10.0 ft. Per second fully immersed; integral 20.0 ft. Cable included

**Functional Description:**

Used to accurately measure conductivity/resistivity from ultrapure and pure water applications

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
