Supply Items And Quantities:

70420a mms baseband phase noise test set, 70001a mms mainframe, 70427a mmsdownconverter, e4411a rf spectrum analyzer, asset control modules for above hardware, pentium pc with windows nt 4.0, 32 mb ram, 1 gb hard drive, digitizer, e5500-10001 application software-version 1.05 and all user's guides

Special Features:

Mfg name is noise measurement system. Option 0001 26.5 ghz microwave phase detector, am detector, high power input capability, automatic switching. Option 406 2ea. 8664a rf source with option 004 and with asset control module, each source includes: 08665-90078 jun 98 hp 8664a/8665a/b synthesized signal generator (inc. Opt 001, 003, 004, 008, 010) operation and calibration manual. Option e18 special option which includes e55484a-asset control module for 8566/8560 series spectrum analyzer, e5485a-asset control module for 8662a/8663a sources, e5489a-asset control module for 5345a/53100 series frequency counters. E5494a-asset control module for 3585 spectrum analyzer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
