**Overall Length:**

14.000 inches

**Overall Height:**

3.500 inches

**Overall Width:**

17.000 inches

**Current Type:**

Ac

**Frequency Rating:**

50.0 hertz and 60.0 hertz

**End Application:**

C-17a automatic test equipment

**Output Impedance Rating:**

75.0 ohms

**Voltage Rating:**

Between 90.0 volts and 250.0 volts

**Calibrated Signal Output Range:**

Video output from 0.0 to 1.0v, in 0.1v steps

**Product Name:**

Model 3200 remote rgb color video pattern generator

**Phase:**

Single

**Special Features:**

Delivers basic video test patterns for performance test of displays which operate at virtually any format/scan rate. Full remote control capability - selection of format, pattern, video level, and auxiliary modes such as polarity via ieee-488 system interface.

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T320-j
