Inclosure Feature:

Multiple item w/carrying case

Test Type For Which Designed:

Used at depot maintenance level to test the transponder interface unit (tiu) circuit card assembly to the component level, as a standalone unit. This requires that power and discrete signals applied under normal operation be applied to test the tiu's full capabilities

Special Features:

Mfg name is transponder interfaceunit test fixture. This fixture contains a power supply to output the tiu operating voltages and cabling to interface the tiu cca with the advanced message oriented data security module (p4be) discrete signals as well as interface with the cdu for diagnostic cabling. Fixture is housed in a standard personal computer case

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T228-a
