Frequency Range Rating:

+9.000/+1500000.000 kilohertz

Special Features:

Gpib and parallel centronic interfaces; high resolution; high contrast monochrome vga display; calibrated field measurements; data transfer to a computer with built-in floppy disk; 5.0 decibel step attenuator; operating temperature 0.0 degrees c to 55.0 degrees c

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A532p0
