**Width:**

95.0 millimeters

**Length:**

255.0 major inches

**Dc Voltage Rating:**

9.0 volts 1st operating power rqmt

**Major Components:**

Splash proof padded carry case; mains charger; serial cable; user manual

**Depth:**

40.0 millimeters

**End Application:**

Radiated or 50 ohm connection beacons

**Electrical Power Source Relationship:**

Self-contained

**Internal Battery Accommodation:**

Included 1st operating power rqmt

**Inclosure Feature:**

Multiple item w/housing

**Test Type For Which Designed:**

Decoding, power and frequency measureing

**Operating Test Capability:**

Power and frequency at 406mhz; measure power and audible indicatgion of 121.5mhz homing signal

**Product Name:**

Emergency locator transmitter tester

**Functional Description:**

Provides accurate, independent validation of the operation of cospas/sarsat distress beacons, for example epirb, elt and plb

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T228-a
