End Application:

Reentry system test set (rsts)

Indicator Type:

Digital display

Installation Design:

Rack

Display Type:

Liquid crystal

Measurement Range:

-70.0/+144.0 decibels all indicators single range

Features Provided:

Portable

Special Features:

Name assigned by manufacturer single channel power meter; consists of p/n e4418b nsn 6625-01-477-0908 with addition of option 004 which deletes the hp11730a sensor cable, addition of option 908 which supplies a one-instrument rackmount kit, addition of option 1bn which supplies mil-std-45662a certificate of calibration

Style Designator:

Rectangular surface mtg

Supplementary Features:

Drawing name: alighment rf power meter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A310a0
