End Application:

Reentry system test set (rst)

Unit Type:

Vxibus 200 mhz universal counter

Special Features:

Mfg name is vxibus 200 mhz universal counter. This two channel high performance counter occupies a single c-size vxibus slot. This module has eleven automatic measurement functions, including phase, pulse, peak rise/fall time, time interval and ratio measurements, all with extremely high resolution. Also functions as dvm (max, min and dc voltages). Also includes one low pass filter per input channel, each with selectable hysteresis

Functional Description:

200 mhz frequency measurement, 9 digits per resolution, 1ns time interval resolution

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
