Overall Length:

18.125 inches

Overall Height:

5.250 inches

Overall Width:

8.500 inches

Current Type:

Ac

Frequency Rating:

50.0 hertz and 60.0 hertz

Accessory Components And Quantity:

Users manual 1; spare fuse 1; air filter 1

Voltage Rating:

90.0 volts and 250.0 volts

Beam Quantity:

2

Screen Size:

80 by 100 millimeters

Sweep Circuits:

Included

Frequency Response Rating:

Not provided

Amplifier Input Impedance Rating Provision:

Not provided

Calibrated Screen Scale:

Included

Product Name:

Analog waveform monitor

Special Features:

Composite or component waveform monitoring; composite vector display; picture display; stereo audio display; time code phasing and amplitude; sch and color framing display; component vector, lightning, diamond and bowtie; this is a multimedia item for authorized users on ta 629aaoo only

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T320-g
