Overall Length:

2.460 inches

Overall Diameter:

0.750 inches

Operating Temperature Range:

-45.0/+85.0 degrees celsius

Average Life Measurement:

Not rated

Basic Shape Style:

Cylindrical

Inclosure Type:

Encased

Installation Design:

Module

Circuit Construction Type:

Solid state

Special Features:

10mhz - 12.4 ghz; 0.5 db sensitivity; type n input, bnc (f) output connections

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
