Overall Length:

12.000 inches

Overall Height:

6.000 inches

Overall Width:

10.000 inches

Circuit Construction Type:

Solid state

Special Features:

1090 mhz pll freq. Source output gated with gaas rf switches; switch controls are generated in and provided interrogation control board in bdpu 1; calibration pulse is amplified to 41 porm 1 dbm; attenuators are used to set the site-specific amplitude of the pulse; pulse off state transmitted power is held below the aoa sensor receive amplitude at less than minus 80 dbm

Functional Description:

Provides pulsed built-in-test (bit) and monitor signal to aoa sensors

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
