**Circuit Current For Which Designed:**

Ac and dc

**Overall Depth:**

9.840 inches

**Overall Height:**

3.460 inches

**Overall Width:**

8.390 inches

**Frequency Rating:**

Between 47.0 hertz and 440.0 hertz

**Installation Design:**

Bench

**Power Source:**

External and internal

**Circuit Attachment Method And Quantity:**

2 receptacle, coaxial

**Operating Voltage Rating In Volts:**

Between 90.0 ac and 250.0 ac

**Phase:**

Single

**Special Features:**

Includes ma2472a power sensor 90 db range; connector type n female (2) on front; display monochrome lcd displays output and gain simultaneously; single input; internal battery 12/24 volts included; display range -99.999 to 99.999; manufacturers name power meter; france has ma2473d sensor, 10 mhz-32 ghz power sensor

**Style Designator:**

Rectangular surface mtg

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A310a0
