Overall Length:

18.600 inches

Overall Height:

7.000 inches

Overall Width:

17.000 inches

Ac Voltage Rating:

Between 0.001 volts and 1.02 kilovolts

Dc Voltage Rating:

Between 0.0 volts and 1.02 kilovolts

Frequency Rating:

Between 10.0 hertz and 500.0 kilohertz

Unpackaged Unit Weight:

49.000 pounds

Calibration Type:

Any acceptable

Functional Description:

Sources direct voltage and current alternating voltage and current with multiple waveforms and harmonics two simultaneous voltage outputs or voltage and current to simulate dc and ac power with phase control, resistance, capacitance, thermocouples and rtd's

Shape:

Rectangular

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T263-b
