**Special Features:**

Thermal converter converts ac input signals to dc voltages proportional to the rms values of the input; input voltage 1v rms; input impedance 50p/m0.15 ohms; output impedance less than 10; output voltage 7.0 mv for nom. Input

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A32200
