Overall Length:

9.120 inches

Overall Height:

2.870 inches

Overall Width:

8.360 inches

End Application:

For use as a signal conditioning preamplifier for oscilloscopes, network and spectrum analyzers

Special Features:

Manufacturer name differential amplifier; 1 channel 100 mhz with precision voltage source; power requirement, 100-250 vac, frequency 48-66 hz, 35 watt ; da 1855a amplifier used with nsn 6625-01-496-0932, dxc 100a. T.O. 33a1-2-1855a-1, differential amplifier

Unpackaged Unit Weight:

4.750 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A511I0
