Storage Temperature Range:

-55.0/+74.0 degrees celsius

Disposition After Initial Use:

Reusable

Product Name:

Agilent 11812a verification kit

Special Features:

Consists of 355d vhf 0-250db step attenuator, two 8491a 10db fixed attenuators that are assembled into a single unit; one interconnecting coaxial cable 8120-4781

Functional Description:

Used to verify calibration levels of 8902a signal generator opt5 (6625-01-313-6541)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23800
