Circuit Construction Type:

Solid state

Special Features:

Used vlsic technology; creates complex signals from 6 fundamental waveforms; digitally synthesizes precise sine, square, triangle, ramp, white noise, dc and 3 more identical channels which can either modulate 1st synthesizer or can be summed to output; a second 50ohm output is added to provide a 2nd separate signal for 2-channel applications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
