Circuit Current For Which Designed:

Dc

Indicator Type:

Digital display

Installation Design:

Rack

Special Features:

10 hz to 2.5 ghz measurement range; dual-channel and differential voltage measurements; up to 300 volt measurement range; 1 percent accuracy at full scale; true rms response below 30 mv; option 50-ohm terminated sensor to 2.5 ghz; optional low-frequency probe for measurements from 10 hz to 100 mhz; dc recorder output

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A310a0
