Overall Length:

14.600 inches

Overall Height:

10.300 inches

Overall Width:

3.600 inches

Operating Temperature Range:

+0.0/+55.0 degrees celsius

Average Life Measurement:

Not rated

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Module

Circuit Construction Type:

Solid state

Special Features:

Vxi microwave synthesizer; 3 slot register-based; frequency range 10 mhz to 20 ghz; option 1e1 add 70 db step attenuator, option unf add high power (plus 20 dbm) 2-20 ghz, option unh add improved spectral purity (10 mhz to 2 ghz), option 0b1 manuals, option r51b warranty, option 0bw service documentation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
