**Overall Length:**

14.600 inches

**Overall Height:**

10.300 inches

**Overall Width:**

3.600 inches

**Operating Temperature Range:**

+0.0/+55.0 degrees celsius

**Average Life Measurement:**

Not rated

**Basic Shape Style:**

Rectangular or square

**Inclosure Type:**

Encased

**Installation Design:**

Module

**Circuit Construction Type:**

Solid state

**Special Features:**

Vxi microwave synthesizer; 3 slot register-based; frequency range 10 mhz to 20 ghz; option 1e1 add 70 db step attenuator, option unf add high power (plus 20 dbm) 2-20 ghz, option unh add improved spectral purity (10 mhz to 2 ghz), option 0b1 manuals, option r51b warranty, option 0bw service documentation

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A32200
