Circuit Current For Which Designed:

Ac and dc

Indicator Type:

Dial w/pointer

Installation Design:

Hand held

Features Provided:

Portable and zero adjuster

Operating Voltage Rating In Volts:

Between 115.0 ac and 230.0 ac

Special Features:

Built in alarm system alerts operator when power density exceeds the selected level; provides a 100 millivoltfull scale signal for chart recording or for interfacing with a digital voltmeter

Style Designator:

Hand-held

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A310a0
