Special Features:

Unit shall meet all accuracy requirements when operating temperature is between 0 degrees celsius and 50 degrees celsius. Warm up time shall not exceed 30 minutes. Dc voltage better than 0 to 1100 volts, output voltage within + or - 5 degrees celsius of the calibration temperature. Shall be capable of accuracy specifications at any calibration temperature between 15 and 35 degrees celsius. Ac voltage, .22mv to 1100v, accuracy .0022 to 1100 volts, frequency range 40 - 300 khz. Weight shall not exceed 75 pounds, 7" h x 22.75" (shall not exceed) shall fit in a standard 19" rack. Power consumption, less than 300 watts

Functional Description:

High accuracy dc, ac and resistance calibration system, that may include a monolithic integrated unit or separate amplifier as necessary

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
