Overall Length:

12.000 inches

Overall Height:

2.500 inches

Overall Width:

8.000 inches

Operating Temperature Range:

+0.0/+50.0 degrees celsius

Average Life Measurement:

Not rated

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Top of cabinet/counter

Circuit Construction Type:

Electron tube

Product Name:

Power quality analyzer

Special Features:

Integrates power monitoring instrument with color graphical user interface

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A32200
