Ac Voltage Rating:

100.0 volts or 120.0 volts or 220.0 volts or 240.0 volts

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Test Type For Which Designed:

Low distortion phase standard

Phase:

Single

Special Features:

Describes a low distortion phase standard, that produces two digitally synthesized, low distortion sine wave with independently selectable amplitudes from 50mv to 120v rms over a frequency range from 1hz to 200khz

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
