End Application:

4920-01-128-0375: an/usm-464, countermeasures test set

Unit Type:

Pulse generator or waveform generator

Product Name:

Circuit card assembly, function generator

Special Features:

6u vme single width module

Functional Description:

Provides amplitude and pulse modulation generation circuits for the control of rf signal generation in an automated test system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-b
