End Application:

Monitor, multifunction

Indicator Type:

Digital display

Installation Design:

Panel

Display Type:

Light emitting diode

Product Name:

Inavy monitor, multifunction

Special Features:

Display features: three-lined led display; voltage, current and power values are simultaneously available; a five button keypad at the bottom provides a simple, easy-to-use interface to read all metered data; led display provides long life and durability and is ideal for harsh temperature environments; provides connection to industry standard rs-232 or rs-485 communication channels; the meter can connect to any serial network and reports circuit information using industry-standard modbus or dnp 3.0 protocols; housed in a rugged metal enclosure protected from emi and fri emission; internal protection circuits protect the power supply from damaging spikes and transients; unit is available in a super bright version for viewing in direct sunlight which provides a polarized, sun-reflecting lens and super bright leds - this is ideal for outdoor breaker panels and hard-to-read applications
