Overall Length:

12.100 inches

Overall Height:

2.400 inches

Overall Width:

10.100 inches

Ac Voltage Rating:

Between 100.0 volts and 240.0 volts

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Special Features:

Includes one data acquisition system that supports any lan or wan plug-in line interface module (lim); designed for dispatched and remote distributed troubleshooting use and for providing additional test ports for the j6800a network analyzer and j6802a distributed network analyzer mx; interfaces to external gps receiver for global time synchronization; built-in power supply; can be daisy chained from other distributed network analyzers

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T263-c
