Overall Length:

26.600 inches

Overall Height:

7.500 inches

Overall Width:

19.000 inches

End Application:

Vdats

Product Name:

Load mainframe electronic

Functional Classification:

Aa-9.1

Special Features:

Contains six slots for load modules; mainframe can dissipate up to 300watts per slot; mainframe contains a processor, gpib connector, rs-232 connector and interface circuits, trigger circuits, front panel keypad and display; operating voltage is 100 to 250vac at 48 to 63hz; input current 4.2amps at 100 to 127vac or 2.2amps at 200 to 250vac; 440va input; 38amps inrush current; operating temperature 0 degrees celcius to 55 degrees celcius; this item includes option 909 (rack mount kit with handles) and support rails e3663ac; tech order 51c3-1-145-3

Functional Description:

Evaluation of dc power supplies, batteries, and power components

Relationship To Similar Equipment:

6625-01-524-9399

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
