Terminal Quantity:

2

Terminal Type:

Coaxial

End Application:

Vdats

Radio Frequency Rating:

Between 0.0 gigahertz and 26.5 gigahertz

Tuning Type:

Fixed

Special Features:

High directivity, can measure ac and dc dependant on which scalar netw ork analyzer is used, manufacturers name is directional bridge, actual frequency range for this bridge is 10mhz to 26.5ghz

Reference Data And Literature:

T.O.51c3-1-143-3; tech manual 33a1-6-168-11

Supplementary Features:

Designed for use with 8757 in ac or dc detection mode, 8755 or 8756 in ac detection mode

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T389-c
