Width:

8.500 inches

Length:

18.900 inches

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Calibration

Operating Test Capability:

Range, vertical and horizontal

Product Name:

Optimar

Functional Classification:

Aa-10.8

Special Features:

Fully automated measuring run for digital devices, may be used horizontally for measuring inside micrometers, electronic hand wheel for manual control of the measuring anvil's movement, self-adjusting sensitivity of the electronic hand wheel, complies with the basic comparator principle, high accuracy glass-scale measuring system with computerbased error compensation, uses plug in power supply unit, box-shaped rigid machine housing

Functional Description:

Testing and calibration of dial indicators. Dial comparators, lever-type test indicators, inductive and incremental probes

Height:

9.250 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
