Case Material:

Aluminum or steel

End Application:

Gpete

Product Name:

6400b series precision component analyzers

Functional Classification:

6430b

Special Features:

Fast automatic testing of capacitors in a production environment; select measurements from any of the instruments range and perform up to 8 different tests on each component; tolerance bins can be selected for each of the tests; instrument selects the ove

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-d
