End Application:

Benchtop reconfigurable automatic tester (brat)

Product Name:

Variable input output module

Special Features:

50mhz variable input output module; 16 inputs and 16 outputs; memory types include stimulus; output; tristate; algorithmic response; expect; mask; algorithmic record; memory depth 65535 vectors, operating temperature 0 to +40 degrees celcius; storage temperature -40 to +75 degrees celcius

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
