**End Application:**

Benchtop reconfigurable automatic tester (brat)

**Product Name:**

Variable input output module

**Special Features:**

50mhz variable input output module; 16 inputs and 16 outputs; memory types include stimulus; output; tristate; algorithmic response; expect; mask; algorithmic record; memory depth 65535 vectors, operating temperature 0 to +40 degrees celcius; storage temperature -40 to +75 degrees celcius

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T228-b
