End Application:

Radar avionics depot test station

Unit Type:

Pulse generator

Product Name:

Pulse generator

Functional Classification:

Bb-1.2

Special Features:

4 front panel led's indicating power status; system status, access and run, 7 front panel smb connectors for external clock; trigger in; trigger out; output1; output2; exp clock in; exp trigger in, has access slot for master module expansion cable, pulse period range from 3.3nsec to 100 msec, 2 single ended output channels, functional modes include auto; timer; gate; burst; external width; master/slave, capable of double pulse on either channel; both or neither, burst count range 1 to 5.368 gigapulses, auto timer range 80usec to 10 sec

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-b
