End Application:

F-15 ais

Product Name:

Verification hardware test package

Special Features:

Consists of (1ea) main storage case assembly p/n 5207454-9, contents include all required cables; adapters; attenuators; filters; and network analyzer verification kits required to perform verification procedures in support of antenna test station 13a6520-9 and 13a6520-10, includes verification procedures for digitizer o-scope and 3 channel attenuator; vxi digital multimeter; frequency counter; test port cables; wr-90 calibration kit; tnc calibration kit; 3.5mm calibration kit; network analyzer; pulse generator; spectrum analyzer; transfer function analyzer assembly; c/w peak power meter; peak power sensor assembly and detector extension cable assembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23800
