End Application:
F-15 ais
Product Name:
Verification hardware test package
Special Features:
Consists of (1ea) main storage case assembly p/n 5207454-9, contents include all required cables; adapters; attenuators; filters; and
network analyzer verification kits required to perform verification procedures in support of antenna test station 13a6520-9 and 13a6520-10,
includes verification procedures for digitizer o-scope and 3 channel attenuator; vxi digital multimeter; frequency counter; test port cables;
wr-90 calibration kit; tnc calibration kit; 3.5mm calibration kit; network analyzer; pulse generator; spectrum analyzer; transfer function
analyzer assembly; c/w peak power meter; peak power sensor assembly and detector extension cable assembly
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
Yes - demil/mli
