Inclosure Type:

Uninclosed

Power Source:

External

Features Provided:

Electrostatic sensitive

Intelligence Data Handling Capability:

Electrical current receiving manual

Product Name:

Electroscope

Special Features:

When electroscope is charged the conductive rod rotates to indicate the charge magnitude; used for detecting and demonstrating static charge

Supplementary Features:

Additional equipment recommended, banana plugs 2, kit sf-9068 for transfer of charge to capacitor plates; kit sf-9068 consists of charge sampler 1; capacitor plates 5.6 cm diameter 2; insulated handle 1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A31700
