Mounting Type:

Table

Overall Length:

432.0 millimeters

Overall Height:

103.0 millimeters

Overall Width:

426.0 millimeters

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Voltage Rating:

Between 100.0 volts and 250.0 volts

Frequency Band Quantity:

6

Modulation Type:

Am and fm

Product Name:

Analog signal generator

Special Features:

Performance enhancements include low power (<-110 dbm) and flexible reference input (1-50mhz); interfaces include ieee-488.2, gpib and 100baset lan; 0 - 55 c operating temp; 512mb flash memory; iso-9001 compliant; front panel connectors include rf-output and usb 2.0; rear panel connectors include rf-output, sweep-out, am, fm, pluse, trigger-in/out, ref-input, 10mhz-out, usb 2.0, lan and gpib; frequency range 100 khz to 1 ghz

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T320-j
