Modulation Type:

Am and fm and pulse

Product Name:

N5181a-unt am, fm, phase modulation

Special Features:

Signal generator option recommended for testing analog communications systems, simulating unwanted modulation on a carrier, or simulating interfering signals when performing receiver tests; simulates telemetry tones for satellite receiver tests requiring fm or satellite communication traffic with the addition of an external modulation source for frequency shift keying (fsk); generates complex signals consisting simultaneous am, fm, or pulse modulation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T320-j
