Circuit Current For Which Designed:

Dc

End Application:

Divers propulsion device 4500-100

Indicator Type:

Bargraph

Installation Design:

Panel

Power Source:

External

Mounting Facility Type And Quantity:

2 unthreaded hole

Display Type:

Light emitting diode

Product Name:

Battery status indicator assembly

Special Features:

Visual indicator to li-ion battery charge level

Special Markings:

Battery status

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A310a0
