Mounting Type:

Bench and self-contained in case

Overall Length:

19.600 inches

Overall Height:

7.000 inches

Overall Width:

16.800 inches

Current Type:

Ac

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Frequency Range Rating:

+10.000/+20.000 gigahertz

End Application:

Test equipment

Accessory Controlling Agency:

Agilent technologies inc

Joint Electronics Type Designation System Item Name:

Agilent e8257c psg cw and analog signal generators

Output Impedance Rating:

50.0 ohms

Voltage Rating:

Between 90.0 volts and 267.0 volts

Frequency Band Quantity:

7

Maximum Signal Output:

Output impedance 50 ohms

Modulated Frequency Rating:

Between 0.5 hertz and 100.0 kilohertz

Product Name:

Psg signal generator

Special Features:

Rf output type-n and precision apc 3.5 male

Special Test Features:

Recommended calibration cycle 24 months

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T320-j
