End Application:

Vxi-mobile aias

Criticality Code Justification:

Feat

Product Name:

Module assembly, local oscillator

Special Features:

This is a modified phase matrix 20309-d6; frequency range is 3.0 to 9.0 ghz; includes auxillary I01 output; I01 freq is 3.0 to 9.0 ghz; I02 freq is 3.25 ghz; I03 freq is 228 mhz (I02 and I03 frequencies are factory set); power output for I01 is 10.0 dbm ; I02 is 1.0 dbm ; I03 is 1.0 dbm ; output impedance is 50 ohms for all I0 outputs, this item has critical form fit and function

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-b
