End Application:

PATE-CC-ORE-6625

Criticality Code Justification:

Feat

Special Features:

High accuracy calibrator for digital multimeters; universal counters; and oscilloscopes, five calibration funtage 0 to 1100; ac current 0 to 2.2 amps; dc current 0 to 2.2 amps, resistance (two and four wire) 0 to 100mohm, includes wideband output port (option 3) which produces ac voltages over frequencies from 10hz to 30mhz, wideband mode is programmable from front panel or i/o interface, all functions can be remotely accessed via ieee-488 gpib and an external controller, this item has critical application

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
