Overall Length:

13.000 inches

Overall Height:

6.200 inches

Overall Width:

6.600 inches

Current Type:

Dc

Modulation Type:

Am and fm

Product Name:

Arbitrary function generator-afg3000 series

Special Features:

Channels: 2; sine frequency: 240 mhz; waveform memory: 4 x 128k; vertical resolution: 14 bits; modulation: am, fm, pm; source: internal/external; internal modulating waveform: 2 mhz to 50.00 khz; weight: 9.9 lbs; operating temp: 0 to 50 degree celsius

Functional Description:

Used to electronic test and design, sensor simulation, functional test, education and training

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T320-j
