End Application:

F-16 aircraft

Special Features:

For high speed optical communications testing, extinction ratio and q-factor measurements, eye-pattern and pulse shape analysis, relaxation oscillation testing, optical signal analysis, compliance testing and nrz, rz and optical duobinary signal characterization; 1 input channel; 700nm to 1650nm effective wavelength range

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
