Overall Length:

23.880 inches

Overall Height:

5.220 inches

Overall Width:

16.750 inches

End Application:

Rf305bj 6625-01-476-3862 brat test system

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Operating Control Method:

Automatic

Installation Design:

Rack

Control Type:

Local or remote

Circuit Construction Type:

Solid state

Connection Type And Location:

Connector, plug rear

Operating Ac Frequency In Hertz:

48.0 single voltage and 440.0 single voltage

External Ac Operating Voltage In Volts:

120.0 single voltage and 250.0 single voltage

Criticality Code Justification:

Agav

Product Name:

Frequency synthesizer

Phase:

Single

Functional Classification:

Bb-1.4

Special Features:

10mhz to 2.3ghz (1hz resolution) including gpib; opt 905 is rackmount

Functional Description:

Microsecond switching computer controlled system synthesizer and ieee-488 programmable keyboard entry bench synthesizer with extensive sweep and synchronization capability

Entry Date:

09-10-20

Reference Data And Literature:

To 33d7-3-438-1

Relationship To Similar Equipment:

Modified aeroflex fs2000b-2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
